#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 30-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Daniel et al. – 6,171,327.

Daniel-'327 (Fig. 1; col. 4, lines 50-60, for example) discloses a medical device/filter 21 including membrane 22 having various coatings to impart various functional performance and apertures 23 cut by laser ablation.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3734

1. Claims 30-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over RAGHEB et al.-6,096,070 in view of Daniel et al. -6,171,327.

As to claims 30-32 and 35, RAGHEB-'070 (Fig. 1) discloses a medical device such as a stent 12 having a first bioactive coating layer 18 on the outside/first surface of stent 12 and inside/second surface of stent 12 substantially free of a coating. As to claims 33-34, RAGHEB-'070 (Fig. 1; claim 15) discloses second bioactive material in coating layer 20 covering inside/second surface of stent 12. RAGHEB-'070 (col. 20, line 8-9) discloses only part of the stent 12 needed to be coated but does not explicitly disclose cutting through a coated portion. However, Daniel-'327 (Fig. 1, col. 4, lines 50-60) discloses cutting apertures 23 through membrane 22 with laser ablation. It would have been obvious to one of ordinary skill in the art at the time of the invention to cut a coated Ragheb-'070 stent as recited in the claims, for this manufacturing process is suitable to provide through apertures in a medical device as taught by Daniel-'327.

2. Claims 30-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over RAGHEB et al.-6,096,070 in view of Dang -6,471, 721.

As to claims 30-32 and 35, RAGHEB-'070 (Fig. 1) discloses a medical device such as a stent 12 having a first bioactive coating layer 18 on the outside/first surface of stent 12 and inside/second surface of stent 12 substantially free of a coating. As to claims 33-34, RAGHEB-'070 (Fig. 1; claim 15) discloses second bioactive material in coating layer 20 covering inside/second surface of stent 12. RAGHEB-'070 (col. 20, line 8-9) discloses only part of the stent 12 needed to be coated but does not explicitly disclose cutting through a coated portion. However, Dang-'721 (Fig. 4; col. 6, lines 25-30) discloses stent 10 being made by laser cutting

Art Unit: 3734

through stent body material including coating 14. It would have been obvious to one of ordinary skill in the art at the time of the invention to cut a coated Ragheb-'070 stent as recited in the claims, for this manufacturing process is well-known to produce a stent having stent struts with sides having no coating and being substantially perpendicular to the outer and inner surfaces of the stent (Fig. 5, Dang-'721).

### Response to Arguments

Applicant's arguments with respect to claims 30-35 have been considered but are moot in view of the above new ground(s) of rejection.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hayes can be reached on 571-272-4959. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
